

Project Initialization and Planning Phase

Date	28 June 2026
Project Name	Rising Waters
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A regional meteorologist or disaster coordinator.	Monitor flood risk and issue timely evacuation warnings for flood-prone communities during heavy rain events.	Conventional forecasting methods often fall short in predicting exact localized floods at the right time.	Current legacy frameworks lack real-time predictive ML capabilities using diverse meteorological features.	Anxious and concerned over potential casualties and insufficient response windows.
PS-2	A government disaster management official.	Efficiently allocate emergency resource teams and rescue equipment across multiple vulnerable districts.	Static reports fail to provide a scalable, centralized interface for instantly viewing dynamic regional risk metrics.	There is no integrated web interface mapped to modern analytics pipelines for rapid priority sorting.	Overwhelmed trying to coordinate field teams blindly across rapid weather shifts.
