

Demonstration of Proposed Features

Date	8 July 2026
Project Name	Rising Waters - Real-time Flood Prediction and Alert System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Auth & Profile	Secure login/registration pipeline with parameterized configurations.	Implemented	Yes	Verified fully via test suite.
2	Live Data Ingestion	Automated collection of sensor variables via REST endpoints.	Implemented	Yes	Real-time streams active.
3	Predictive Risk Engine	Machine learning algorithm calculating flood risk classifications.	Implemented	Yes	Calculates scores instantly.
4	Interactive Map UI	Geographic reporting layer presenting monitoring stations.	Implemented	Yes	Displays mapping perfectly.
5	Automated Alerting	Twilio SMS microservice routing warning communications.	Implemented	Yes	Broadcasts operate normally.
6	Historical Trends	Analytical graphs providing localized historical comparison dashboards.	Implemented	Yes	Renders correct analytics.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6

Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
