

Project Demo Planning

Date	8 July 2026
Project Name	Rising Waters - Real-time Flood Prediction and Alert System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Concept	Explanation of the core problem statement, objectives, and domain architecture.	2	Project Lead
2	Architecture Overview	Walkthrough of data engineering pipeline, ingestion methods, and system block logic.	2	Data Engineer
3	ML Engine & Validation	Demonstration of the predictive model, risk scoring criteria, and performance metrics.	3	ML Developer
4	Live UI Walkthrough	Interactive walkthrough of the geographical tracking interface and telemetry visuals.	3	Frontend Developer
5	Alert Invalidation Test	Execution of live test scripts verifying instant automated Twilio SMS alert delivery.	3	Backend Developer
6	Q&A and Feedback	Open discussion block handling immediate evaluator questions and capturing architectural advice.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Focus strongly on current flood monitoring challenges and project scope goals.
2	Solution Overview	Keep structural explanations brief, emphasizing module connectivity and pipeline flow.

Step	Activity	Notes
3	Live Feature Demonstration	Ensure active REST API streaming connections are responsive before launching map tracking.
4	Q&A Session	Provide direct, concise metrics summaries corresponding to exact evaluation criteria.
